

Your New Bathroom In One Day

Area Preparation Sheet

Prior to refinishing your tub and/or countertops it is essential that the area be prepared in advance of the arrival of our crew. Please take note of the following:

General Preparations

- Please clear all surfaces and areas where work will be done. Remove all items from the entire bathroom area. Remove all items from tubs, showers and counters.
- Please move and cover all furniture and personal belongings (including pictures on walls) 8-10 feet from the work area. Please remove any wall hangings and other decorations out of the immediate work areas.
- Please place all plants, pictures etc. in another room with the door closed (large aquariums need not be moved, but must be covered). Furthermore, any doors leading to adjacent rooms should be closed. All pets should be kept outside or in a garage.
- Tubs, showers and walls should be as clean as possible. If necessary, scrub down the surfaces with an abrasive cleanser to remove soap film buildup. Area must be dry.
- Please repair any leaky faucets prior to work. Area must be dry.

Refinishing

- No people or pets are allowed in the residence while refinishing is in process and for five (5) hours after.
** No exceptions to this rule will be considered **
- Please allow the area to air dry ventilate for a minimum of five (5) hours before re-entry. People with respiratory conditions, allergies, or other medical necessities should remain out of house for a minimum of 24 hours to avoid upset.
- Please make necessary arrangements given that the item(s) being refinished will be unavailable for use for at least 24 hours.

Thank you again for your cooperation.
